

(v1.0)

HOW TO INSTALL THE FULL FORM STAND

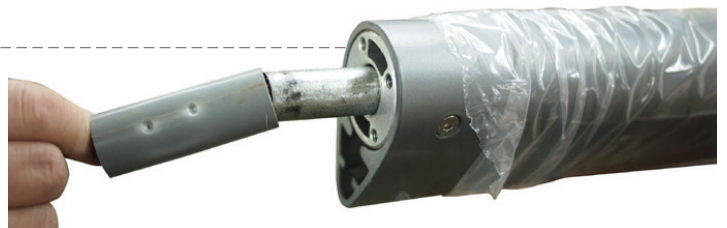

COMPONENTS IN THE PACKAGE

INSTALLATION

Step 1

Cut and open the end of the plastic wrap on the main pole and remove the plastic cover from bottom tip.

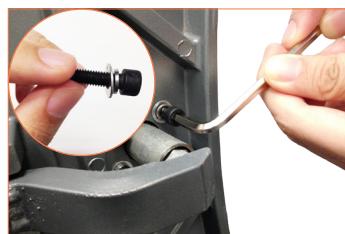

Step 2

Install the main pole into the base stand.

- Lift up one side of the base stand.
- Insert the bottom tip of the pole into the hole of the base stand (The triangular side of pole should be in front).

- Insert 4 black screws with washers and metal rings through the base stand.
- Tighten all of the screws with allen wrench.
- Dispose the plastic wrap on the main pole.

Step 3

Install the hanger.

- Remove 2 screws from the hanger.
- Insert the hanger into the top of the aluminum tube.
- Fix the hanger from the aluminum tube with 2 screws.
- Fasten the screw cap onto the hanger.

Step 4

Install the arm/shoulder cap hanger.

- Cap hanger and screws are enclosed in a package.
- Place the arm/shoulder cap hanger on the main pole.
- Fix the cap hanger in position with 2 screws.

Step 5

Cut off and remove the protective tape on base stand.

Congratulations!
You have successfully assembled
the full form stand.

APPLICATIONS

Hang the detachable
arms/shoulder caps here.

Use the hanger here to
hang garment samples to
the stand.

Hold the mannequin with both hands
while lifting up / lowering down
the mannequin by stepping on the pedal.

Press down on front level
to engage brakes for wheel.

CAUTION

Do not step on the pedal before hanging the mannequin in order to prevent the user from being injured by the sudden rising of the pole.

Our full form stands are specialized for a specific range of mannequin sizes. Please do not place the incorrect form side on the stand.
